

Online Cloud Portfolio Website

Overview

An online cloud portfolio website is a digital platform where individuals or businesses can showcase their work, achievements, and projects to a global audience. Here's a description of what such a website typically includes:

Front-end:

1. **REACT JS**
2. **REDUX TOOLKIT**
3. **MATERIAL UI**
4. **TALIWAND CSS**

Back-end:

1. **NODE /EXPRESS JS**
2. **MONGODB / MONGOOSE**
3. **NEXT JS**
4. **JWT**

Milestones

1. Portfolio Showcase

The primary purpose of the website is to display a portfolio of work. This can include it jobs, design, coding projects, development, or any other creative or professional work.

2. User-Friendly Design

It allow users to customize the look and feel of their portfolios without requiring coding skills.

3. Social Media Integration

Links to social media profiles and sharing options allow for easy networking and sharing of portfolio items.

4.Mobile Responsive

Cloud portfolio websites are typically designed to be mobile-responsive, ensuring a seamless experience for users accessing your portfolio on smartphones and tablets.
